BUSINESS MOTIVATION MODEL GLOBAL STANDARD

January 11, 2017

1. What is the global standard.....?

The Global standard aims to develop a set of common principles and standards for propriety ,intergrity and transparency in international business and finance. For the marketing purpose all other source will be mention to the circle.

2. Inroduction.....!

Global standards today are developed,adopted and recognized in multiple ways. In this paper, I will describe how standards bodies and industry are adapting to a more nuanced international standards paradigm.

3. BMM – Business Governance in a Volatile Word..

The industry standard for sturcted business strategy,providing a scheme (or stucture) for developing,communicating,and managing 'business plans' in an organization manner...

- Identifies and defines the elements of business plans
- Identifies factors that motivate the establishing of business plans.
- Indicate how all these elements and factors inter – relate.

All element of the business motivation model arev developed from a business perspective.

- A business model for the elements of the business plans is developed before system design or technical development is begun.....
- Business plans become the “foundation” for IT , connecting system solutions firmly to their business intent.

4. Is the BMM a methodology.....?

No

5. BMM vocabulary.....!

Two major areas of the Business motivation model..... The **means** and **ends** of business plans.

➤ ENDS

Vision | Desired Result | Goal | Objective

➤ MEANS

Mission | Course of action | Strategy | Tactic

6. What is the Goal Modeling.....?

Goals should support the “Strategis plan” whis=ch is a written document that articulates an organization’s strategy for archiving its mission and vision. The goal development process looks at this strategy and determines the necessary steps to get there!!

7. Examples of SMART Business Goals....!

If you take one aspect of budget costs, which could be supply costs, you can write SMART goals to reduce them.....

The goal development process, includes a discussion with the appropriate people and should answer the questions :

WHO || WHAT || WHEN || HOW

These four questions help to facilitate a discussion and thought process that flushes out the detail needed for writing effective goals
